

What people think depression looks like

What depression really looks like

Friend: Hey, checkout my Java code

```
public class Permuter {
    private static void permute(int n, char[] a) {
        if (n == 0)
            System.out.println(String.valueOf(a));
        else
            for (int i = 0; i <= n; i++)
                permute(n-1, a);
        swap(a, n % 2 == 0 ? i : 0, n);
    }
    private static void swap(char[] a, int i, int j) {
        char saved = a[i];
        a[i] = a[j];
        a[j] = saved;
    }
}
```

When you're a programmer and see a hacking scene in a movie

He is just updating the system and installing random packages

# WHO WOULD WIN?

```
public class PublicationController : ApiController
{
    private readonly Common.CMS coreServiceClient = new Common.CMS();

    // GET api/publication
    public IEnumerable<KeyValuePair<string, string>> Get()
    {
        return coreServiceClient.GetPublicationList();
    }

    // GET api/publication/{id}
    public KeyValuePair<string, string> Get(string id)
    {
        return coreServiceClient.GetPublication(id);
    }
}
```

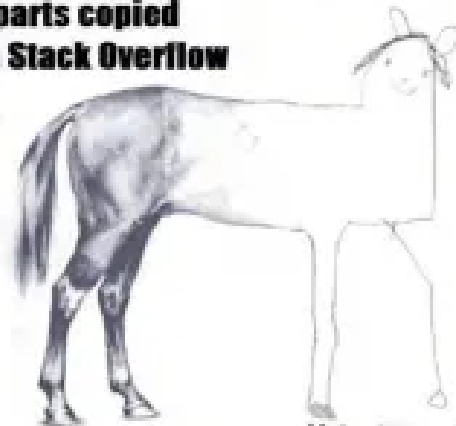

A large complex script of code written by Professional computer programmers And designers

One no-mouth winky boi

Most of our code

The parts copied from Stack Overflow

// don't touch. it works

Your crush knows binary

They think you're a 10

They think you're a 10
